Digital Commons Brings New Life to Scholarship

A recent article in the *Chronicle of Higher Education*¹ features the University of Nebraska's Digital Commons, and demonstrates how well this service-oriented repository model can work for scholars.

Digital Repositories Foment a Quiet Revolution in Scholarship

Daniel Johnson for The Chroniele

Paul Royster, who coordinates the U. of Neburska at Lincoln's Digital Commons, offers a complete servauthors. "We do the hunting and gathering and upleading," he says.

By Jennifer Howard

While predictions of an open-access revolution have fallen short, the article rightly notes that a well-managed repository can bring contributors other benefits. These include:

- A publishing venue for unique materials
- An opportunity for scholars to expand their audience
- A place for scholars to resurrect their early work
- A place to showcase work that is unique to the university (e.g., student scholarship, legacy collections, administrative documents, etc.)

Butler Libraries has observed an additional benefit through feedback from up-and-coming faculty. When combined with <u>SelectedWorks</u>, our repository provides contributors with a means to share their scholarship with prospective employers.
