ANNUAL CATALOGUE
OF
Butler University,
Irvington, Ind.,
FOR THE
THIRTY-THIRD SESSION,
1887-'88,
WITH ANNOUNCEMENTS FOR 1888-'89.

Indianapolis:
Baker & Randolph, Printers and Binders.
1888.
ANNOUNCEMENTS FOR 1888.

Athenian Exhibition...............................Friday, 8 p. m., June 10.
Baccalaureate Address, by Pres. Benton...Sunday, 4 p. m., June 10.
Pythonian Exhibition..............................Monday, 8 p. m., June 11.
Philokurian Exhibition...........................Tuesday, 8 p. m., June 12.
Demia Butler Exhibition..........................Wednesday, 10 a. m., June 13.
Mathesian Exhibition...............................Wednesday, 8 p. m., June 13.
Class Day............................................Thursday, 10 a. m., June 14.
Field Sports........................................Thursday, 2 p. m., June 14.
Alumni Reunion......................................Thursday, 8 p. m., June 14.
Commencement.......................................Friday, 9 a. m., June 15.

ANNOUNCEMENTS FOR 1888-'89.

FINAL EXAMINATIONS.

Senior Examinations close (1889)..............Friday, May 24.
Undergraduate Examinations close (1889)........Tuesday, June 11.

ANNIVERSARIES.

Mathesian .............................................May 5.
Pythonian..............................................October 19.
Philokurian...........................................November 6.
Athenian ...............................................May 27.
Demia Butler.........................................June 10.

HOLIDAYS.

National Thanksgiving Day and the Friday following.
Christmas–New Year's, inclusive.
Washington's Birthday.

MEETINGS OF DIRECTORS.

Annual Meeting, Tuesday of Commencement Week, June 11, 1889.
Quarterly Meetings, second Tuesday of January, April, July and October.

TERMS.

First Term begins Tuesday, September 11; closes Friday, December 21.
Second Term begins Tuesday, January 2; closes Friday, March 22.
Third Term begins Tuesday, April 2; closes Friday, June 14.
Commencement, Friday, June 14.
ORGANIZATION OF THE UNIVERSITY.

The founding of an institution of learning of the highest grade began to be discussed in 1841, in the general conventions of the Christian churches in Indiana. In 1847 a definite resolution was adopted, which committed them to this work. After a full canvass of the State, in 1840, in order to ascertain the views of those interested in the undertaking, it was decided to build such an institution in Indianapolis, under the name of Northwestern Christian University.

A charter was obtained from the Legislature, both liberal and comprehensive, and fitted to promote the purposes of its projectors. The charter went into effect January 15, 1850, and the University was formally opened November 1, 1855. The charter provides for a joint stock corporation, the shares of whose stock are fixed at one hundred dollars each; on which, when paid up, or when interest on the same is regularly paid, the stockholder receives six per cent. in tuition.

The minimum amount of stock was fixed at $75,000, and the maximum at $500,000. The minimum amount was obtained in about eighteen months, and then the Commissioners, under the charter, proceeded to erect a substantial building, and to organize the various departments and courses of study.

In 1873 a proposition was made to remove the University to Irvington, a beautiful suburb of the city, and was formally accepted; and in the fall of 1875 instruction of the College classes was begun in the new building.

The change in the name of the University was made February 28, 1877, after full deliberation by the Board of Directors. They adopted the name "Butler University," in honor of him who had given largely to its endowment, and who for twenty years had given a large part of his time to its interests.

This change does not effect any chartered obligations of the University in respect to property, graduates, or its purposes, all of which have been determined by a legislative act and the recorded resolutions of the Board of Directors.
BOARD OF DIRECTORS.

OF

GOVERNMENT AND INSTRUCTION.

ALLEN R. BENTON, LL. D., PRESIDENT,
Professor of Mental Science and Biblical Literature.

WILLIAM M. THRASHER, A. M.,
Professor of Mathematics and Astronomy.

HARRIET NOBLE, A. M.,
Demia Butler Professor of English Language and Literature.

SCOT BUTLER, A. M.,
Professor of Latin Language and Literature.

OLIVER P. HAY, A. M.,
Professor of Natural History and Chemistry.

HUGH C. GARVIN, A. M.,
Professor of Modern Languages and Literature.

DEMARUCHUS C. BROWN, A. M.,
Anderson Professor of Greek Language and Literature.

THOMAS M. IDEN, P. M.,
Adjunct Professor of Chemistry.

F. ROLLIN KAUTZ,
Assistant in Preparatory Department.

T. M. Iden, Librarian.
S. B. Negley, Janitor.
E. W. Bray, Sup't of the Boarding Hall.
GENERAL STATEMENTS.

The College of Literature, Science and Arts embraces four years of study in the regular classes. Three courses of study are offered to students, each requiring the same time and equal labor. These courses are the Classical, the Philosophical and the Scientific.

Students having certificates of graduation from High Schools, whose courses of study have been approved by the State Board of Education, will be admitted to the Freshman class without examination. In Greek, however, such students are usually conditioned; in which case the student is assisted in bringing up that study.

Graduates of the Preparatory School of the University pass without further examination into the Freshman class, corresponding to their Preparatory course.

Students desiring to enter the University for special studies will be admitted to classes for which they, in the judgment of the Professor in charge, may be fitted to enter. If possible to enter one of the regular courses, it is usually better for the student to do so.

Graduates who have received the Bachelor’s degree will, on application, be assigned a course of advanced study leading to the Master’s Degree.

Women are admitted to all the classes of the University, subject to the same conditions and enjoying the same educational privileges as men.

In order to encourage excellence in scholarship, the Board of Directors of the University will remit the tuition fee of every graduate of the commissioned High Schools of the State who shall have received the first honor in scholarship at his graduation.

Text-books are furnished at the University, and are sold to the students at publishers’ prices.
DEPARTMENTS OF STUDY.

I.
MENTAL AND MORAL SCIENCE, AND BIBLICAL LITERATURE.
A. R. Benton, Professor.

1. Instruction in Psychology is given by means of lectures, and a text-book. Lectures are given in order to introduce new topics not treated in the text-book, or to give more ample discussion to subjects but partially treated by the author. Class discussions on controverted points are encouraged, and essays are required. Haven is used as a text-book. A course of lectures on the History of Philosophy is delivered the second term of the Senior year—three lectures per week.

II. Moral Philosophy is studied during the third term of the Senior year. Lectures accompany the text-book, thus securing a full discussion of the subject. The text-book used as the basis of instruction is Haven.

III. The Freshman and Sophomore classes recite in the Bible two hours each per week. The Freshman class study the old Testament—the first term, the Pentateuch; the second term, Joshua, Judges, and the books of Samuel; the third term, selected portions of the Hebrew Scriptures. Instruction in this department is by carefully prepared lectures, and students are required to study with care those portions of Scripture embraced in the lectures. This method secures a systematic development of Bible history and doctrines. The Sophomore class study the New Testament—first term the Gospels; second term, Acts; third term, the Epistles.

In the Senior year the Evidences of Christianity are studied, with full exposition of the various questions of modern skepticism. The text-book in this subject is Everest's Text-Book of Christian Evidence.

IV. Logic and Political Economy are taught in this department; also a course of lectures on the Constitution of the United States is given, embracing the history of the formation of the Constitution and an analysis of our form of government. Hill's Jevons is used as a text-book in Logic. Gregory or Walker in Political Economy.

The Senior class will be allowed to elect Woolsey's International Law in place of Day's Æsthetics.
II.

PURE AND APPLIED MATHEMATICS.

W. M. Thrasher, Professor.

In the Classical and Philosophical courses, Mathematics will embrace Arithmetic, Algebra, Geometry, Trigonometry, and their applications to Mechanics and Astronomy.

In the Scientific course will be given, in addition, a complete course in Analytical Geometry, Differential and Integral Calculus, and Analytical Mechanics.

Requisites for entering the Freshman year—Arithmetic and Wentworth's Algebra completed, or an equivalent.

The first Preparatory class will begin Algebra (Wentworth) the third term.

First Term in the second year of Preparatory Course will be devoted to chapters 1st to 8th, inclusive. Second Term—Chapters 9th to 18th inclusive. Third Term—The work completed.

Sophomore Year (Scientific).—First Term—Bowser's Analytical Geometry, plane and solid. Second Term—Bowser's Differential and Integral Calculus. Third Term—Bowser's Analytical Mechanics.

Should the class, or any part of it, prefer a lighter course in Analytics, Calculus and Mechanics, Peck's course may be substituted for Bowser's.

Junior Year (Scientific).—First Term—Bowser's Analytical Mechanics, finished. During the Second and Third Terms, they will complete Silliman's Physics. Chase's Meteorology in Third Term.

(Classical and Philosophical).—Text-Book—Silliman's Physics. Classical and Philosophical students will devote the First Term to Silliman's Mechanics. They will then be joined by the Scientists, at the beginning of the Second Term, and the Physics will be completed by the three classes together during the remainder of the Junior year.

Senior Year.—First Term—The necessary formulæ of Spherical Trigonometry will be mastered. Newcomb's Treatise on Astronomy will be studied during the Third Term.

SPECIAL WORK.

Students desiring a more exhaustive mathematical knowledge than is possible in the general scheme, can arrange a course of one or two years in Theory of Equations, Modern Geometry, Circular Functions, Determinants, Analytical Geometry in plane and space, Calculus, Mechanics, and Theoretical Astronomy.
The course and text-books can be determined by letter or personal consultation with the Professor of this department.

With books of reference in Mathematics and Physics, the University Library is well supplied, furnishing a fair equipment for special or post-graduate work. Montucla Histoire de Math., 4 vols; Delambre Hist. de L' Astron., 5 vols.; Laplace Mecanique Celeste, 5 vols.; Müller's Lehrbuch der Physique, 4 vols.; Fourier on Heat; Maxwell on Magnetism; Gauss, Klinkerfues, Resal on Astronomy; in Mathemat. Physics, Neumann, Kirchoff, Beer, etc.; Mechanics, Tait, Lagrange, Routh, etc.; Determinants, Baltzer, Hanus, Muir, Dostor, etc.; Geometry Modern, Mulcahy, Salmon, Chasles, etc.; Infinites Anal., Durege, Schlömilch, Bertrand, Sturm, Todhunter, Boole, etc.; Anal. Geom., Salmon, Briot, Frost, Schlömilch, etc., with Airy, Cheyne, Godfray, Chauvenet, Mougé, Hesse, Ideler's Handbuch der Math. Chronologie, etc.

III.

ENGLISH LITERATURE.

HARRIET NOBLE, Professor.

In the Preparatory work of the English Department the student has, in addition to his text-books, frequent practice in written exercises, and an introduction to the study of both prose and poetry.

Before entering the Freshman class he is expected to be well grounded in Grammar and the elements of Rhetoric, and must be able to write off-hand, and fairly correctly, a composition on some familiar literary subject.

Whatever a man's vocation may be, he should be able to maintain literary interest for his own instruction and culture. This fact has led to an English course, extending through the four college years.

The intention of this department is to develop in the student a knowledge and appreciation of the best in English thought.

The history taught has two important purposes: First, to show the development of English institutions, and thereby give a truer understanding of the spirit of American institutions; second, to give an intelligent basis for the study of biography and literature.

Compositions are assigned—one long one in each term and frequently several short ones—to train the student in correct expression, and especially in clear thinking, and the best selection and collocation of ideas. The exercises are in different kinds of composition, as narration, description, exposition, and especially on various kinds of subjects—historical, biographical and literary.

The Rhetoric of the Junior year is to further instruct in the general principles of style, and in the various procedures involved in finding.
sifting and ordering the material of discourse. This affects the student's own work, and his judgments of the writings of others.

Previously to the Junior year the effort is to give judicious methods of studying literary compositions—poems in particular—and to cultivate an appreciation of their beauties. In this year is taught criticism of prose style by the examination of four distinguished authors. In the fall term of the Senior year is a critical study of the three greatest English poets. After this introduction to belles-lettres follows a cursory view of the development of English thought and style.

FRESHMAN YEAR.—Twenty one of Guest's Lectures on the History of England; some of Hale's Longer English Poems; Shakespeare's Julius Caesar.

SOPHOMORE YEAR.—Guest's Lectures completed.

JUNIOR YEAR.—Rhetoric, Brain or Genung, one term; Minto's Prose Manual in connection with the study of prose style in DeQuincey, Macaulay, Carlyle and Bacon.

SENIOR YEAR.—First term, critical study of Shakespeare, Milton and Wordsworth; second term, History of English Literature to the Restoration; third term, History of Literature continued.

Essential books of reference: Greene's History of the English People, a student's atlas and an unabridged dictionary.

Aids to study: Library, atlases, maps and photographs.

IV.

LATIN LANGUAGE AND LITERATURE.

Scot Butler, Professor.

Students in Science take only the Preparatory course in Latin; others, the College course also.

Applicants for admission to advanced classes must pass examination on work that precedes.

First Preparatory class have Grammar and easy exercises.

Second Preparatory class review Grammar work of year preceding, finish Part First of Allen's composition, and read three books of Cæsar's Commentaries, and two of Cicero's Orations Against Cataline.
Freshmen have Latin Composition and Roman History throughout the year, read three of Cicero's Orations and four books of Virgil's Æneid.

Sophomores have Latin Composition through the first term, Roman History (the Empire) and History of Literature during the second and third terms; read Livy one term, Horace two terms.

Juniors read selected parts of Cicero's Tusculan Disputations, Old Age, Friendship and Dream of Scipio.

V.

GREEK LANGUAGE AND LITERATURE.

D. C. Brown, Professor.

For admission to the Freshman class students will be required to pass an examination on all the general principles of Greek Grammar except Prosody, on Jones' Greek Prose Composition or Leighton's or Boise's Lessons in Greek or an equivalent (the English exercises to be translated into Greek with the accents), and one book of Xenophon's Anabasis.

The Preparatory class will use Leighton's Greek Lessons, and Hadley & Allen's Greek Grammar; will study Jones' Greek Prose Composition and Xenophon's Anabasis one term.

The Freshman class will read the Anabasis two terms, and Homer's Iliad the third term. A daily drill in Greek Prose Composition (Jones) will be continued through the year. Particular attention will be given to prosody and scanning during the study of Homer, and to the History of Greece (Smith) from the earliest period to the end of the Persian wars, including discussions on the origin of the Homeric Poems.

The Sophomore class will read from any of the following authors: Homer, Thucydides, Herodotus, Plato, Xenophon (Mem), Lucian or Demosthenes (Philippics). They will be required to study the History of Greece from the close of the Persian wars to the close of the Peloponnesian war; also Grote's chapter on Socrates. Special attention will be given to securing an elegant English version of the authors read.

The Junior class will read Demosthenes, Æschylus, Sophocles, Euripides or Aristophanes. It will be the constant aim in reading these authors to express their meaning in concise and vigorous English. The History of Greece during the Macedonian supremacy will be studied. Twice a week during the Third Term the History of
Greek Literature will be taught, partly by means of a text-book and partly by lectures. Select passages in various authors not previously read may be given the class for translation. In the Junior year Hebrew may be elected in place of the Greek.

BOOKS OF REFERENCE.
Every student in the College classes should be provided with a good History of Greece, Classical Atlas, Classical Dictionary and Greek-English Lexicon, A. Keith Johnson’s Classical Atlas, Anthon’s or Smith’s Classical Dictionary.

VI.
NATURAL HISTORY AND GEOLOGY.
O. P. HAY, Professor.

The instruction in this department is given by means of lectures, recitations, laboratory practice and field work.

The Freshmen of the Scientific course devote the first two terms to the study of Vertebrates, and are taught to identify and describe species and how to make and preserve collections. The third term will be employed in the study of the Invertebrates in anatomical work, or in further investigation of some class of vertebrates. For these purposes the collections of the museum are available; but each student is required to collect a considerable number of species.

Physiology is studied by the students of all the courses during the first half of the Sophomore year. Martin’s Human Body is used as the text-book; but in order to give more reality to the students’ knowledge of the subject, numerous dissections and preparations of some of the more important organs of some of the domestic animals are brought before the class. The subject of Histology is illustrated by means of a considerable number of well-prepared microscopic slides.

Botany is studied by all the students during the last half of the Sophomore year, the greater part of the third term being devoted to the collection and identification of species of native plants. Each student is required to prepare an herbarium. Bessey’s Essentials of Botany is used as a text-book, but the subject is further elucidated by lectures, by the exhibition of numerous preparations, and by means of the compound microscope. In the identification of species the works of Gray and Wood are employed.

During the first and second terms of the Junior year the students of the Scientific and Philosophical courses study Zoology. The time
is employed in taking a general view of the whole animal kingdom. Meteorology is studied during the third term of the Junior year by Scientific students. Chase is used as a text-book, the class reciting two hours per week.

All Seniors enter Geology at the beginning of the first term and continue the study until the close of the second term. LeConte's Geology is at present taken as a text-book. Care is taken to bring before the class numerous specimens of minerals and rocks, and of the most important fossils of each of the geological ages.

THE MUSEUM.

In the collections of the University there is abundant material for illustrating the sciences of Zoology, Mineralogy and Geology. Some of the materials have been obtained by purchase, some have been contributed by the friends of the institution, and some by the National Museum; while a considerable portion has been collected by the professors who have occupied the chair of Natural History. There is a very fair collection of minerals, including a number of the most important ones. The Paleozoic Age is represented by numerous specimens of rocks and fossils, principally from localities in Indiana. There are also fossils of Cretaceous deposits of Mississippi and Kansas, and Tertiary fossils from Mississippi and elsewhere. Of land, fresh-water and marine shells there are several hundred species. There is a considerable collection of alcoholic specimens of fresh-water and marine invertebrates. The collection of fishes, made partly by Prof. D. S. Jordan, partly by Prof. Hay, and partly the gift of the National Museum, is one of the best in the West. There are also numerous specimens of reptiles, birds and mammals.

VII.

PHYSICS.

W. M. Thrasher and O. P. Hay, Professors.

In the course of Arts and Philosophy, Physics will occupy the Junior year.

During the first term will be mastered the general properties of matter; principles of motion and force; laws of motion as affected by gravity and other forces separately and combined; theory of machinery; elasticity and strength of materials.

During the second term will be taught hydrostatics and hydrodynamics, followed by the kinetic theory of gases; the theory of undulations in elastic fluids, with applications to sound and the theory of musical instruments. Then follow laws controlling other waves.
with applications to refraction and reflection of light and construction
and use of optical instruments.

The third term will be given to the study of heat and applications,
and to electricity and magnetism. Lectures on the methods of gener-
ation of electricity and its application to lighting, telegraphy, the
telephone and the driving of machinery will be given.

The Scientific Junior course differs from the above only in substitu-
ting for the First Term's work a more radical treatment of statics
and dynamics by the aid of the differential and integral calculus.

The text-book for this purpose will be Bowser's or Peck's Analytical
Mechanics. The text-book in Physics will be Silliman's.

Chase's Meteorology occupies two hours weekly of Third Term Sci-
entific Junior year.

VIII.

CHEMISTRY.

O. P. Hay, Professor. T. M. Iden, Assistant Professor.

Students in all the courses will begin the study of Chemistry with
the First Term of the Junior year. The text-book used will be Rem-
sen's Introduction to the Study of Chemistry.

Four recitations each week are required. The lessons will be
illustrated by experiments, and these, so far as practicable, will be
conducted by the students themselves under the direction of the
Professor. Students are thus trained from the first in the use of
apparatus and the observation of chemical operations. Recitations
will also be accompanied by occasional lectures from the Professor,
and each student, toward the close of the term, shall report the
results of his investigation concerning some particular subject assigned
him early in the term for special study.

The First Term will be devoted to the study of General Chemistry
—the elements and their compounds. This term only is required of
students pursuing the Classical Course, all others continue the study
throughout the year.

With the beginning of the Second Term, students enter upon the
study of Qualitative Analysis, working at least four hours a week in the
Laboratory, with one hour for recitation or lecture. They will spend
this term in the detection of bases. The instruction in Qualitative
Analysis will be given mainly by lectures, but the class will be re-
quired to have "Hill's Lecture Notes" for reference.
The Laboratory is well furnished for this work, being conveniently arranged and supplied with gas, water, ventilation, and all necessary chemicals and apparatus for the study of Qualitative and Quantitative Analysis. The best books on Chemistry will be found in the Library, and best journals of Chemistry in the reading-room.

Each student has his own desk, with separate outfit of apparatus and chemicals. No charge is made for the use of chemicals, but students will be required to pay for all apparatus actually broken or injured.

The study of Qualitative Analysis will be continued throughout the Third Term, students working at least three hours a week in the Laboratory. After a short course in the detection of acids, simple and mixed salts, minerals and alloys are analyzed.

Students who desire to make a specialty of Chemistry may arrange with the Professor to spend more than the required time in the Laboratory, no extra charge being made. Opportunity will be afforded for work in Quantitative Analysis to any who may desire to pursue that branch of the study.

The design of the whole course is to illustrate the general laws of chemical science, and the aim is to lead the student not only to observe the fundamental facts of Chemistry, but also to understand as far as possible the connection between observed facts and principles, so that discipline of mind as well as scientific knowledge may be acquired.

IX.

MODERN LANGUAGES.

H. C. Garvin, Professor.

The Philosophic and Scientific courses comprise nine terms of German and three terms of French. In the Classical course French or German is required in the Junior year.

GERMAN.

Second Preparatory.—First Term—Otto's German Grammar four times a week.

Second and Third Terms—Otto's German Grammar twice a week. Reading of easy prose, such as Schmid's Erzählungen and Grimm's Märchen twice a week.

Freshman.—Reading three times a week and translation out of English into German once a week throughout the year. The reading matter is selected from the following: Schmid—Ostereier, Rosa von Tannenburg. Benedix—Plays. Riehl—Geschichten und Erzählungen. Schiller—Tell, Jungfrau von Orleans, Maria Stuart.
Sophomore.—Reading three times a week and translation out of English into German once a week. The reading matter is selected from the following: Goethe—*Hermann und Dorothea, Gespräche mit Eckermann, Iphigenie*. Müller—*Geschichte des deutschen Volks*. Freytag—*Ahnen, Bilder aus der deutschen Vergangenheit*. Lessing—*Nathan der Weise*.

Junior.—Students in the Classical course, who elect German in the Junior year, read with one of the lower classes.

Students in the Philosophical course, who elect German in the Junior year, read *Faust*.

Senior.—Students in the Philosophical and Scientific courses, who elect German in the Senior year, read Schiller's *Über die ästhetische Erziehung des Menschen*. Students in the Classical course, who elect German in the Senior year, read with any class that is suited to their advancement.

Throughout the course much attention is given to word-analysis. As much practice in conversation is afforded as can be consistently with earnest class work.

**FRENCH.**

First Term—Four recitations a week in the grammar.

Second Term—Two recitations a week in the grammar, and two recitations in reading and translating.

Third Term—One recitation a week in the grammar, and three recitations in reading and translating.

**EDUCATIONAL AUXILIARIES.**

Lectures.—Lectures are delivered by members of the Faculty, Friday morning, before the whole school; also, Founders' day is celebrated by an address, and from time to time special lectures are given by persons invited from abroad.

During the year lectures have been given for the benefit of young men entering the ministry. These have been delivered by E. L. Frazier, of Kokomo; E. J. Gantz, of Indianapolis; J. W. Connor, of Indianapolis; and B. J. Radford, of Eureka, Ill. The address on Founder's day was delivered by John C. Miller, of Nineveh.

Rhetoricals.—In addition to the requirements in English literature, as indicated in the various courses of study, critical essays will be required of the several classes on subjects pertinent to their different branches of study.
LITERARY SOCIETIES.—Five Literary Societies are now organized and in successful operation at the University. These are the Mathesian, Pythonian and Philokurian, composed of young gentlemen; the Athenian and the Demia Butler, composed of young ladies.

All these Societies are, by the By-Laws of the University, placed under the supervision of the Faculty.

The Athenian and the Demia Butler receive the care and attention of Miss Noble.

These societies, properly conducted, are very important agencies in the social and literary culture of the students of the Institution. Well-selected libraries, accessible to the members of the societies, give important additional means of culture. Contributions to them will be thankfully received.

PRIZES.—Members of the Board of Directors offer three prizes to the Sophomore class for excellence in oratory; and the President offers three to the Junior class. Prizes are also offered to members of the Preparatory classes for excellence in declamation.

COLLEGIAN.—The Butler Collegian has been published during the year by the students, and has contained orations, essays and the general news of the University. This publication is intended to foster a literary taste among the students, and it compares favorably with other publications of this class.

COLLECTIONS IN NATURAL HISTORY AND GEOLOGY.—The Cabinet of the University now consists of the following collections:

1. A collection of fossils, minerals and marine shells from California, Ohio, and from this State especially, affords a very complete illustration of the rocks and fossils of the different geological ages.

2. Collections of the marine animals of the coast of New England, made by Professor Jordan, at Cape Cod, and at New Haven, Conn., by Professor Hay.

3. A collection of about one hundred and fifty species of fishes, preserved in alcohol, representing very completely the fish fauna of the Ohio valley and the great lake region.

4. A collection of about four hundred species of land and fresh water shells.

5. A collection of about four hundred and fifty species of marine shells.

6. A number of skins of birds and mammals.

7. A small herbarium.

8. A very considerable number of stone implements and other specimens illustrative of Ethnology.

9. A collection of reptiles, fishes, etc., made by Professor Jordan and Mr. Gilbert in the Allegheny region of the Southern States during
the scientific expeditions of three summers. This collection is of much importance, as it includes the original types of upwards of fifty new species described by Professor Jordan in the annals of the New York Lyceum of Natural History and the Bulletins of the United States National Museum.

10. A collection containing most of the species of reptiles and amphibians of the Mississippi valley.

11. A collection of marine animals of the coast of North Carolina, obtained by the scientific expedition of 1879, at Beaufort.

12. A large series of marine fishes—duplicates procured from the United States National Museum. Of these more than one hundred and thirty species have been received.

13. A collection of fishes and reptiles made during the year 1880 in Mississippi by Professor Hay. This collection includes the types of a number of new species.

14. A collection of cretaceous and tertiary fossils, made also in Eastern Mississippi by Professor Hay.

15. A second collection of fishes made by Professor Hay in Western and Central Mississippi, during the year 1881.

16. A collection of geological specimens made in Northern Michigan by Professor James A. Young.

17. A collection of reptiles and fishes made during the last season in Florida by H. T. Mann and D. M. Davison.

18. A collection of serpents made partly in Indiana and partly in Mississippi, by the late Charles Jameson, of Indianapolis.

19. A considerable alcoholic collection of invertebrates, including many marine and fresh water crustaceans, echinoderms, mollusks and worms.

In the Department of American Ichthyology, the collection in the possession of Butler University is one of the largest in the West.

Numerous specimens of even the commonest reptiles and amphibians from all parts of the world are solicited. Skins of mammals and birds will be very acceptable.

---

UNIVERSITY LIBRARY AND READING ROOM.

The University Libraries contain about 5,000 volumes—many of them quite costly and rare—of the representative and, intrinsically, most valuable books in each of the great departments of literature and science. In science, only the latest and best have been chosen,
Butler University.

The rapidly progressive character of some of the sciences having rendered many books, valuable twenty-five years ago, now almost obsolete. In literature, those authors whom the verdict of ages has approved are well represented. Students will find the best cyclopédias, lexicons and maps, as well as manuals of special sciences, on the shelves. The scientific books are, many of them, exhaustive, and fully sufficient for the demands of any special or post-graduate course. The Library fee is expended annually in the purchase of new books and magazines for the use of students.

The Reading Room.—The best weeklies, monthlies and quarterlies of England, France, Germany and America come regularly to the table of the reading room attached to the Library. These, together with the books of the Library, are daily accessible for reading and reference to all the students of the Institution.

Order.

Attendance.—Punctual attendance is required on the opening day of each term, and at all recitations and examinations.

Those who desire to be absent temporarily from the University during the term are required to obtain from the President previous and definite leave of absence. Any permanent departure during term time, without such permission, will be deemed a sufficient reason for refusing an honorable dismissal.

Conduct.—Students are largely intrusted with the regulation of their general conduct, under a sense of high personal responsibility to do what is right, and to conform to the special obligations resting on them as students of the University.

Among these special duties are, punctuality at all chapel exercises, quiet and good order in the College building, attendance at church each Lord's day morning, and a careful abstinence from all injury to the buildings and grounds. To these general statements may be added the ordinance of the Board of Directors for the government of the University at the end of this catalogue.

Absences.—An aggregate of five unexcused absences from class, chapel or church will bring a student before the Faculty for reprimand, and ten such absences will sever his connection with the University. Absences from classes on account of absence from town will not be excused by the Professor, unless the student presents a permit for such absence signed by the President.
COLLEGE EXAMINATIONS.

Class.—The daily examinations of lessons will be conducted according to the best judgment of the Professor in charge. Careful attention will be given in all cases to secure the use of correct words and sentences. The prime objects of the recitation will be to test the student's preparation, and to develop his logical ability and capacity for expression.

Term.—At the close of each term all the classes will be examined on the branches pursued during the term. These examinations will be entirely written, or partly written and partly oral, as the Faculty may determine. They will always be open for the attendance of visitors; the aim, however, will not be to make them a source of entertainment to visitors, but a rigid test of the student's knowledge. A student, however, will be exempt from examination if he has a class-grade of ninety or more, and has no marks of tardiness or absence, either excused or unexcused. Such marks will be counted, in the case of all students from the second day of the term till the close.

Senior.—The Senior class will be examined on the studies of the Senior year, three weeks before Commencement Day.

COLLEGE RECORDS.

Matriculation.—In the Matriculation Book of the University each student will record his name and age, and the name of the postoffice address of his parent or guardian.

Daily.—In a Class Book, kept by each Professor, will be entered, daily, a record of the proficiency and attendance of each member of the class, from which his class standing will be determined.

Term.—From his class-standing, and the result of his examination at the close of each term, his final standing will be determined, which will be entered in the University Record for future reference. An unexcused absence will be counted as zero in making up the class-standing. Class-standing and examination grade will be rated in the ratio of two to one.

Reports.—During the last week of each term a report of attendance and proficiency of each student will be prepared and sent to the parent or guardian, who is earnestly requested to give these reports careful attention, and to notify the Secretary of any failure to receive them.
I. The degree of Bachelor of Arts is conferred on students who complete the studies in the course of Arts and pass examinations in the same.

II. The degree of Bachelor of Science is conferred on students who complete the studies in the course of Science and pass examinations in the same. This degree may be conferred also on students in special studies, whenever the special work done shall be deemed by the Faculty equivalent for the part of the Scientific course which may have been omitted.

III. The degree of Bachelor of Philosophy is conferred on students who complete the studies in the course of Philosophy and pass the examinations in the same.

No Bachelor's degree will be conferred on any person who may not have studied at least one year in this University.

IV. (1) The degree of Master of Arts, Master of Science, or Master of Philosophy will be conferred on any student who shall have taken the corresponding Bachelor's degree at this University, on the following conditions: (a) When such student shall have pursued a Post Graduate course of study for one year under the direction of the Faculty, have passed a satisfactory examination, and have presented an approved thesis on some one of the subjects chosen for examination; or (b) When, after not less than three years from the time of receiving the Bachelor's degree, such student shall have given satisfactory evidence of having been engaged in some literary or professional pursuit, and shall present to the Faculty an approved thesis on some subject of research. (2) Any of the above-named Master's degrees may be conferred on any person who may have taken the corresponding Bachelor's degree at any other institution authorized by law to confer such degree, when he shall have given to the Faculty satisfactory evidence of scholarship, have pursued a Post Graduate course of study under the direction of the Faculty, and have presented an approved thesis on some one of the subjects chosen for examination.

V. The degree of Doctor of Philosophy will be conferred on graduates of this University, or of any other institution authorized to confer Bachelor's degrees, who, by special study in some department of Science, Literature or Philosophy, may have obtained eminence as original investigators, and shall present to the Faculty a meritorious thesis based on such investigations.
VI. The honorary degree of A. M. and LL. D. will be conferred occasionally on persons who, in addition to possessing fair scholarship, may have obtained eminence in some pursuit or profession.

The above degrees will be conferred by the Board of Directors, upon the recommendation of the Faculty. A fee of ten dollars must accompany the application for the second, or for any honorary degree, which will be returned if the degree be not conferred.

Diplomas.—When a degree has been conferred, a diploma will be presented without further charge.

---

FEES.

IN COLLEGE.

Tuition fee, $6 in scrip, costing .......... per term, $0.75
Incidental fee .................................................. " " 8.00
Apparatus and Library fee ....................... " " 1.00

IN PREPARATORY DEPARTMENT.

Tuition fee, $6 in scrip, costing .................. per term, $0.75
Incidental fee .......... ........................................ " " 8.00
Apparatus and Library fee ....................... " " 1.00
Graduation fee .................................................. " " 5.00

All fees, other than the tuition fees, are paid in money. Scrip can always be obtained for a small per cent. of its nominal value, so that the aggregate of fees, per term, need not exceed ten dollars. Term fees must be paid before admission to recitations.

Scrip.—Scrip is sold in the University office at 12½ per cent. of its nominal value—$6 of scrip for 75 cents in currency. This is scrip accruing on the capital stock of the late Ovid Butler. It is sold by order of the trustees of this stock, and all the proceeds of such sales are expended in the purchase of books for the University Library. To students preparing for the ministry, this scrip is supplied without charge.
LOCATION AND BUILDINGS.

Location.—The College of Literature, Science and Arts is situated at Irvington, a suburb of Indianapolis, four miles east of the city, on the Pittsburg, Cincinnati & St. Louis, and the Cincinnati, Hamilton & Indianapolis Railways; it is also connected with Indianapolis by street cars, making trips every hour. Irvington is tastefully laid out among forest trees, with well-graveled streets and walks. It has two churches—Christian and Methodist—a fine public school building and a graded school of high order. It is a healthy locality, free from saloons and places of amusement.

University Building.—The University building is of brick, trimmed with stone, having a frontage of 135 feet, and a depth of 75 feet, containing in all twenty-four recitation rooms, besides halls, corridors, cloak and retiring rooms. It is heated throughout by steam, supplied with water, and lighted by gas; and, in its internal finish and arrangements, thoroughly suited to the purposes for which it was designed. For convenience, commodiousness and comfort it is all that can be required.

Boarding Hall.—This building is of brick, tastefully and substantially built, and sufficient for the accommodation of sixty resident students; and its dining-hall is large enough to seat at its tables nearly as many more. Students are here boarded at cost, and at the lowest cost compatible with wholesome living. This we are enabled to do on account of the average number of boarders and the purchasing of goods at wholesale prices. The average cost for the year has been $2.25 for table board and 40 cents per week for room rent.

Each room is furnished with stove, bedstead, mattress, table, chairs and wardrobe, the student furnishing whatever else he may need.

Students may room at other houses and take their meals at the Hall; many young men have found it convenient to do so. Those who live near, and who go home on Friday to return on Monday, are allowed a proportional reduction of price.

Boarding.—Board can be had in the best private families for $3.50 to $4.50 per week. Students who “club” or rent rooms can live comfortably on one-half the above rates; and houses, or rooms in houses near the University, can be had at low rates. Quite a number of large, new houses can be rented.
THE COLLEGE OF LITERATURE, SCIENCE AND ARTS.

Three courses of study, as seen below, are offered to the students of the University—the Classical, the Philosophical, and the Scientific.

The requisites for admission to the Freshman class are the completion of the studies in the Preparatory Department. Graduates of High-schools, whose course of study is approved by the State Board of Education, are admitted without examination; and, if needed, they will be aided in bringing up any language study on which they may be conditioned.

Also, graduates of the Indianapolis Classical School, conducted by Prof. Sewall, are received without examination.

Applicants for admission must present to the President satisfactory evidence of good, moral character, and, if they come from another college, they must bring a certificate of class-standing and of honorable dismissal.

Candidates for advanced standing must give satisfactory evidence, by examination or otherwise, of proficiency in the studies already passed by the class they propose to enter.

Applicants for admission are required to subscribe to the by-laws of the Institution as a pledge of their observance; students must settle with the Secretary and be registered for the classes of each term before taking part in the recitations.

Examinations for admission to the University will be held on the first day of each term.

---

**PREPARATORY DEPARTMENT.**

The Preparatory is established to secure accurate and complete preparation for entering the College Classes. Instruction is given this class of students chiefly by the Professors, who have a heightened interest in this work, from the fact that successful instruction in the higher classes depends largely on the preliminary training received in this school.

It is greatly to the advantage of students, who are preparing for College, to receive the instruction of this department.

Also, much valuable time is often lost to the students by pursuing studies in the lower schools which have little or no relation to entering College.

This course of study is also well adapted to those who desire to fit themselves for teaching or for business. To meet the needs of such, Prof. Iden gives instruction in Arithmetic, two terms, and in Bookkeeping three terms.

Students who enter this department are expected to give satisfactory evidence of a knowledge of the "common branches" of an
Butler University.

English education; and of this a teacher's license is usually taken as evidence.

The books used in the Preparatory are Allen & Greenough's Latin Grammar; Swinton's Outlines of History; Kellogg & Reid's Analysis; Wentworth's Arithmetic and Algebra.

Ind.

Pres. David S. Jordan, Ph. D., 1877, President Indiana State Univer-
sity, Bloomington, Ind.
THE ALUMNI OF BUTLER.

It is believed that the subjoined catalogue contains the names of all the graduates of Butler University. Since the graduation of the first class in 1856 till the present two hundred and sixty persons, including both sexes, have been graduated from the University. Owing to a failure in making the early Alumni record complete, in respect to the full names, occupation and place of residence, the present issue doubtless contains some imperfections.

The Committee of the Alumni have been diligent in their efforts to make this record complete; and after much correspondence, they feel assured that in the main this record of the Alumni will be found to be correct.

It is, however, very desirable that any one who may detect any errors in this Alumni Catalogue will at once inform Prof. T. M. Iden, Secretary of the University, of the same. The full name, class, occupation and address are the important items of information.

It is purpose of the University to publish from year to year the Alumni Catalogue, with a list of the officers of the Association, the time of meeting and the annual exercises. To make this correct and profitable, the co-operation of all the Alumni is solicited.
ALUMNI.

OFFICERS OF BUTLER ALUMNI ASSOCIATION.

President—Hilton U. Brown, '80, Indianapolis.
Vice-President—Carey E. Morgan, '81, Wabash.
Secretary—Miss Eleta Murry, '85, Indianapolis.

ORDINANCE AND BY-LAWS
FOR THE
ORGANIZATION AND THE GOVERNMENT OF THE COLLEGES
OF
BUTLER UNIVERSITY.

ARTICLE VIII.

Section 1. Students of both sexes shall be entitled to admission into this College. Every applicant shall be of good moral character, and if from another college shall produce evidence of honorable dismission therefrom. When application for admission is made, the student, after reading the By-Laws pertaining to students, shall then sign his or her name in a register kept by the Secretary of the Board, stating his or her age, and the name and address of parent or guardian, under a caption, in the following words: "Having carefully read the By-Laws pertaining to students of Butler University, I do hereby subscribe myself student thereof; and I do hereby solemnly promise, during my connection with it, that I will faithfully observe and obey its laws, rules and regulations." All fees, whether matriculation or term fees, must be paid in advance and before admission and recitation.

Sec. 2. After matriculation the student shall select, with the advice and consent of the Faculty, at least three daily recitations, exercises or lectures. He shall be diligent in study, punctual in attendance on class, at examinations, and on all other exercises required. Having entered a class or course of study, the student shall not leave it without the consent of the President and the Professor in charge of the class.

Sec. 3. No student is allowed to frequent any gaming-house or saloon to use intoxicating drinks, to indulge in profane language, to desecrate the Lord's day, or to do anything contrary to good order and good morals.

Sec. 4. All injury to the grounds or buildings is prohibited, and for every offense the amount of damage may be recovered in any court of competent jurisdiction.

Sec. 5. No student is permitted to neglect the call of the President, or of any Professor under whom he may be placed, but must
attend without delay, and must obey the directions of the President, or Professor of the department to which he belongs.

**SEC. 6.** Every student must pay to the Treasurer of the Institution all fees, fines or dues belonging to the College, and he shall not be entitled to a diploma if in arrears to the corporation.

**ARTICLE IX.**

**OF DISCIPLINE.**

**SECTION 1.** The discipline of the University is confined to the Faculty, under the provisions herein contained. As far as practicable it shall be parental, and all severe and disgraceful punishments shall be avoided, and appeals addressed to the reason and conscience. But to maintain good order and secure the very important object for which the Institution was founded, the Faculty may inflict, at their discretion, according to the character of the offense, any of the following penalties:

1. Private admonition.
2. Public admonition.
3. Suspension for a time (at the discretion of the Faculty).
4. Expulsion.

No student shall be publicly suspended or expelled without an opportunity of being fully heard in his or her own defense; and in all cases of expulsion the party expelled may appeal to the Board within thirty days, in which case the action of the Faculty shall not be final until confirmed by the Board of Directors as soon as they can be called together. But whenever the Faculty are satisfied that, owing to habitual idleness, profanity, or any other cause, the presence of a student in the University is unfavorable to its prosperity and the welfare of other students, they may suspend him or her privately, or require the parent or guardian to remove such student from the Institution. In all cases of suspension or expulsion, the delinquent shall forfeit the fees for the remainder of the terms.

**SEC. 2.** The Faculty may, from time to time, make such prudential regulations pertaining to the social intercourse of the sexes as they may deem expedient.

**ARTICLE X.**

All literary societies in the College shall be held as integral parts thereof. They shall be subject, in their organization and management, to such rules and regulations as the Faculty may deem expedient for their welfare, and for the interests of the College. No society or organization shall be formed in the College without the consent of the Faculty.
