KICKSHAWS by Dave Morice

Triennium of the Palindrome For Roman palindromic years, the longest string is from III BC to III AD; for Arabic, 9 BC to 9 AD. The year 1000 was M AD, and 500 and 50, D AD and L AD.

Old Saws in New Clothes time flies; look before you leap; knowledge is power

Romancing the Numbers There are 1495 Romantic numbers, none self-referential (except for ZERO which has no Roman numeral). No pair of number names have equal Arabic and Roman sums. The largest Romantic number is 44,099; the largest Roman numeral is MLV, which can be found in several number names from 1,055 to 44,055. However, note that Infinity beats them all!

Tragic Square The magic constant is Unhappiness, while the letter totals (forming a rhopalic sequence) are magic, also.

Exe YOU=EWE, 1=EYE. Squeeze EXE in, and you have eWe, eXe, eYe.
The Thirteenth Floor In "Anagram Crackers" the palindrome is hidden in the dialog "She opts to STOP POTS AT A TOP'S SPOT." / "A TOP'S SPOT AT A--?" / "STOP POTS for Alister!"

MISSISSAUGA, CANADA'S ODDEST CITY by Howard Richler
