Would you like to join the tennis club? I'd LOVE to! How about the Sierra Club? NATURALLY! And the cereal club? Not on your LIFE! The Action Club? AFFIRMATIVE! You get the idea. In the two puzzles below, try to match each invitation in the left-hand column with the appropriate REJOINder in the right-hand column. If you think some are unforgivably awful puns, join the club!

Would you like to join

1. the Laverne club?  a. aye, aye
2. the anti-scale club? b. count me out
3. the Good Morning America club? c. forget it!

In a New York Times advertisement December 18 1983, Fred the Furrier thanked "1475 Carols, 2870 Barbaras, 2567 Anns, 633 Alices, 22 Elizabeths, 675 Natalies, 1 Zoe" for their making him New York’s Furrier. Is this a true tabulation of his customers? If so, their relative frequencies are somewhat at variance with figures cited in Leslie Dunkling’s First Names First (Universe Books, 1977). Assuming Fred’s customers were typically born in 1925, the ranks of these names are, respectively, 30, 2, 10, 22, 7 and above 50 for the last two. Fred seems to have far fewer Elizabeths than one would expect, but far too many Carols and Natalies. Was the copywriter overly influenced by the nearness of Christmas?
