A REEDABLE-DEERABLE ALPHABET

NYR INDUCTOR
Chappaqua, New York

Word pairs such as REJECTED-DEJECTER, RESERVED-DESERVER, and REDUCED-DEDUCER fall into the special class of anagrams which we may call "reed-deer pairs". One member of the pair begins with RE- and ends with ED-, while the other begins with DE- and ends with -ER. If the pair is DEEDERED and DEREEDED, we are left with an identical middle component. A person who isolates these middle components is both a DEEDERER and a DEREEDEER. The middle component can be REREEDED and REEDEERED (by a REREEDER and REEDEERER) to form the original pair again.

The middle components of the abovementioned reed-deer pairs (JECT, SERV, DUC) are not very interesting. They are much more interesting when they are words themselves. An example of a reedable-deerable word is PRESS, which gives rise to the pair DEPRESSER-REPRESSED. Reedable-deerable words are even more fun when they are etymologically unrelated to the reed-deer pair; for example, the word BAT produces the unrelated pair REBATED-DEBATER.

Can you produce an alphabet of reedable-deerable words? I have 26 such words which fit the bill, but it must be admitted that some are very forced (notably JAIL). Perhaps you can do better!

A  deadjuster-readjusted  P  deporter-reported
B  debater-rebated  P  depresser-repressed
C  decanter-recanted  Q  dequiller-requilled
D  deducter-reducted  R  derailler-reailed
E  deeder-reeded  S  designer-resigned
F  definer-refined  S  descriptor-rescripted
G  degrader-regraded  T  detailer-remailed
H  dehusker-rehusked  T  detester-retested
I  deinker-reinked  U  deuniter-united
J  dejailer-rejailed  V  devester-revested
K  dekinger-rekinged  W  dewaterer-rewatered
L  delighter-relighted  X  dxylographer-rexylographed
M  demister-remisted  Y  deyellower-reyellowed
N  denester-renested  Y  deyielder-reyyielded
O  deorderer-reordered  Z  dezester-rezested
