

ANAGRAM QUIZ 19

ANIL

Perth, Australia

This time every clue is a polyanagram—multiple anagrams of the answer concatenated into a sentence or phrase that defines or hints at the answer. Sometimes two anagrams join ends to form a single word. These “zips” are noted and divided by a |. Numbers of letters in the answer are given in parenthesis; (2|9) means the answer is an 11 letter word of 2 and 9 letter parts.

1. (<Latin) copier; on recap I lit “not real” pic. I retain ol’ pic. (11)
