Concentrated Consonants

TEMPLE G. PORTER
Philadelphia, Pennsylvania

The twenty-two words needed to complete this puzzle are composed mostly of consonants. Indeed, only eight of the words contain any vowels. In order to make the task easier for you, we have supplied all the vowels.

Some of the words are of Welsh origin, and contain one or more W's which function as vowels in the Welsh language, but are not recognized as vowels by the average user of English. Other words come from certain eastern European languages in which the liquid consonants L and R obviate the necessity for a vowel. Finally, there are deliberate coinages and slang interjections.

It would have been impossible to solve this puzzle by using any single reference book before 1965. In that year one of the best and most unusual books in logological history was published. This puzzle owes its existence to that book alone. You will find its title with the puzzle's solution.

The Diagram

THE JOURNAL OF RECREATIONAL LINGUISTICS
**Horizontal Clues**
