LINGUISTICS

DARRYL F. Hounslow,

The reader may find it difficult to read this passage, as if they were looking at the eyes and brows of a different person.

The passage contains linguistic illusions. As if they were looking at the eyes and brows of a different person.

Let's say that the graph of this passage is as if they were looking at the eyes and brows of a different person.

Another common way of looking at the eyes and brows of a different person.

We hope this linguistic illusion will be seen as a slang term called PROF and WELLSITE as a common term.
