

MORE ENIGMATIC REBI

PHILIP M. COHEN
Aliquippa, Pennsylvania

The May 1972 issue of this magazine introduced Word Ways readers to the Enigmatic Rebus -- a collection of the finest rebuses from back issues of the National Puzzlers League's monthly publication, The Enigma. In this issue, an additional collection of 45 rebuses from this source is presented to baffle the reader. As before, two clues to the solution are provided with each rebus: a string of integers denoting the length(s) of the word(s) in the answer, and hints (mostly straightforward) consisting of short phrases. In the word length column, an asterisk indicates a capitalized word; for example, June in January is coded as *4 2 *7. Answers will be found in Answers and Solutions at the end of this issue.

39.	L P L	6 6	the sandpiper <i>Bartramia longicauda</i>
40.	BU ET CK	1 4 2 3 6	a trifling amount
