A THIRTEEN-LETTER POSITIONAL LIST

TOM PULLIAM
Somerset, New Jersey

A number of Word Ways readers have shown a marked interest in words in which the central letter ranged through the alphabet from A to Z, and the letter groups on both sides of the central letter also formed bona fide words. John Meyer looked at seven-letter words in the May 1978 issue; Leslie Card extended the study to nine-letter words in the August 1978 issue; Jeff Grant and Roger Hannahs continued on to eleven-letter words in the November 1978 issue.

In the list of thirteen-letter words given below, my guiding intent was to avoid the use of inferred forms except those clearly indicated. All words, both thirteen-letter and six-letter, can be found in Webster's New International Dictionary, Second or Third Editions.

In all prior lists, the most difficult letter was Q; surprisingly, I had a great deal more trouble finding a word with K in the center.
