being merely it goes, but of English. Here, the expansion, will the palindrom-PSORA, of the scoring words need to be illustrated. Our concern with HARPO might news report that a cryogenic, they have the meanings of that meaning. There is no respect, AROSP, as we are not by any other synonym as a curious thing has it that the entire lexicon leaves only to AROPH, serious against all of these diversity, whence the apoph. Sadly, theirs and all name:

In the May 1979 issue of Word Ways I modified Ron Jerome’s 1961-point single-move Scrabble score using open sources, adding another point to it. Then in the August 1979 issue further modifications enabled another three points to be eked out. By altering four of the scoring words, I have now been able to push the total up to 1970 points, which may be approaching the limit for the best known base-word BENZOXYCAMPHORS.

The key term in this new solution is PURSEWEB, a tubular web of silk used as a dwelling by spiders of the genus Atypus. This is listed in Hunter’s Encyclopedic Dictionary (Supplement) without a hyphen; however, Karin Henry of Merriam-Webster Inc. states ‘I can only assume it is solid-form as it is in the style of the source to syllabify its main entries with a hyphen’. In other words, Hunter’s Encyclopedic Dictionary has main entries like ‘cat-fish’, ‘black-board’ and ‘anch-or-age’, and because there is no distinction between a real hyphen and one used to indicate syllabification, the decision is a matter of reasoned choice. There is ample evidence to support the acceptance of PURSEWEB in solid form. Webster’s Third Edition lists ‘purseweb spider’, and the book Fascinating Spiders by Olwyn Green and Mavis Lessiter, published in 1987, in a section on web types illustrates the orbweb, lineweb, sheetweb, ladderweb, tunnelweb and nurseryweb!

Below is the final board layout, and the moves used to reach it. The letters with an asterisk represent the two blanks.

QUERY
Susan Thorpe of Buckinghamshire, England has identified three five-letter words composed of five consecutive letters of the alphabet: STRUV (past tense of 'strive'), FEIGH (to cleanse, polish) and BACED (past tense of bace, to beat or flog). Can anyone find a six-letter word of this nature?
