

THE OZ CONTRADICTIONARY: PART 2

“ANIL”

Perth, Australia

“Anil” is the pen name of Dr. Charles Melton, a retired Oz (Australian) biologist who privately published in 1999 a 98-page booklet, up/dn, a dictionary and contradictionary of wordplay. This is part of a continuing series of excerpts from his book.

a	z	Biodiversity	a	z

z	a	I toy, ripple over end ...	z	a
		“sorry!” it, vibe, and people die		

Environment

(Men-inventor)
mine nor vent
men-torn vein:
nerve in mont!

Evolution

In, love, out...
outlive? No,
live on out!

Extinction

I in context
(It connex It)

‘Bios id’ is the ‘unconscious’ drive of life to increase differentiation (‘biosity’) to stir it up out of the ‘void’ of unrealized forms

The two alphabet/anti-alphabet arrays, inspired by the DNA double helix’s anti-parallel structure here ‘uncoiled’, reveal in their chromosome-looking crossovers the message “Evolve by love”

'nerve in mont' means 'the hills are alive!'"(Gaea hypothesis)

'connex': connects

Ideologies is ego I dole, **dogmas** Om dags, **illusions** nous is ill, soul is nil, **scared** "sacred"
Haven One? have none, no heaven, **Inferno** Nr One If"? Infer No, non-fire, "**act of God**":

"good" fact of 'cat/dog'

anti-evolutionist a Love institution tuitions anti-love

Darwinism is war mind; is mind war, **or fits** or fist! "**is this negative?** Is this Age I vent"
 (is shit! *get naïve*!!)

reductionism: "in core I'm dust" (**cogito ergo sum?**) "I'm goo-crust ego" **yes, ultra-science**
shapes true essence as physical **fractionation** (no it! A no-It 'carf', a torn, a fiction; **holistic**,
 this Coil), **materialism**: "I'm realist, am **material**, am real-time lariat; I'm at *real* realm, I, at
 metal-air-meat lair" (am it real? Atem lair! **Believing**, veil *Being*; **belief?** Be, lief!)

Devine? *Vide* 'in' (dive in – **begin** 'Being' binge!)

Ethics? Chi's Te (**Taoism** is to "am"; **beliefs?** I be 'self')

dags [Oz] are bits of dried shit around a sheep's anus, so 'Om dags' are bits of cosmic debris tailing us
 'cat/dog' is a metaphor for Yin/Yang, the view that everything comes in opposites, even "bad" acts of God
 without which there would be no good

an anti-evolutionist is someone who doesn't want you to evolve (and "doesn't want to get evolved"; the
 "Love" institution is Christian Fundamentalism

'fits or fist' means both survival by fitting or fighting *and* "If it doesn't fit my theory I'll fight it!" (both
 Creationists and Social Darwinists turn a scientific issue into religious or political propaganda – or vice
 versa)

'get naïve' means go beyond the cynical negativism of our age, "trust the Universe" again

reductionism is the belief that everything can be mastered by reducing it to smaller and smaller parts (this
 theory was 'proved' in Hiroshima and Nagasaki)

'goo crust' is the brain cortex

'no It' denies the indivisibility of Existence as a holo

'carf' [nonce?] is carve – a homonym and, I suspect, early precursor

Atman [German Atem] is the "breath" or spirit which 'resides' in our material bodies; similarly Chi
 [Chinese] is the spirit or life energy flowing through us, which reveres life and underlies morality

Te is Taoist 'ethics' or virtues

'to am' is to be what I am, be my "real self", be here now (Taoism like Buddhism is not a belief system but
 a Way]

Fundamentalism: "I'm 'man's fault' end. Man's fault I mend.

Fundamentalists must end sin!" (A Flatland team 'stuns' if flat-tunes mind.) As fed talisman
 nuts **thy gloomy** mythology, "**Servant**" **preached** chapter and verse: "**Evangelism**, mingle,
 save!" (Lame givens veil, snag me; **fundamentalism** damns me tail fun. Fund a mental "ism")!

Fundamentalists? Mental fun sadists, deaf mutants, nil minds, neat flatus)

'man's fault end' says God made us faulty, so we'll perish without their lame nostrum (what hath God rort?
Rubaiyat: "Did the Potter's hand then shake?")

'talisman nuts' are eager to believe in 'magic' power ("*sounds more like a tasty snack*")

'lame givens' by Robert McGough
