TEN-SQUARE WITH PLACE NAMES

REX GOOCH
Letchworth, Herts, England
rexgooch@ntlworld.com

Although the words in the following square only score 36 out of 50 on my crude scale of merit (because of proper names and spaces), the square as a whole deserves better, as all names are places, and from the same source.

BACKSBACKA Backsbacka, Finland, 63°27', 23°07'
ANHUMINHAS Ribeirao Anhuminas, Brazil, -22°53', -50°50'
CHAHARGALA Chahargal'a-i-Wazirabad, Afghanistan, 34°33', 69°09'
KUHESHAHIN Kuh-e Shahin, Iran, 35°24', 46°32'
SMASVALENE Smasvalene, Norway, 60°58', 4°38'
BIRHASANAH Bi'r Hasanah, Finland, 30°27', 33°46'
ANGALACANE Angalacane, Mozambique, -22°28' 31°31'
CHAHENASIR Chah-e Nasir, Iran, 27°43', 58°01'
KALINANINA Kalinanina, Zambia, -14°23', 24°44'
ASANEHERAD Asane Herad, Norway, 60°28', 5°25'

The following square is very nearly as good (actually preferable for hyphenophobics):

BAGANBATAK Baganbatak, Columbia, 3°12', 99°40
ARABARRAML 'Arab ar Raml, Egypt, 30°31', 31°12
GARANYEMBE Garanyembe, Zambia, -14°25', 26°56
ABAGKANALI Abag Kanali, Azerbaijan, 39°11', 48°36
NANKUNSHAN Nankunshan, China, 23°38', 113°53
BRYANTBANK Bryant Bank, an undersea feature, 28°01', -92°28
ARENSBURGA Arensburga, Estonia, 58°14', 22°30
TAMAHARBOR Tama Harbor, Japan, 34°28', 133°56
AMBLANGODA Amblangoda, Sri Lanka, 7°00', 81°11
KLEINKARAS Klein-Karas, Namibia, railroad siding, -27°34', 18°06

Nan-k'an Shan, Taiwan is a slightly worse substitute for Nankunshan

Only one location is given for a name: there may be more. Locations are given as latitude, longitude. All names are from NIMA, the National Imagery and Mapping Agency's database.

It is notable that there are no places from English-speaking countries.
