THE POWER OF “a” PREFIX

THOMAS L. BERNARD
South Hadley, Massachusetts

The first letter of the alphabet serves many linguistic purposes and numerous grammatical functions. One that has intrigued this writer is the way in which a humble lower case “a” prefix can semantically transform different types of words. This can be in terms of a manner (loud, aloud), a condition (live, alive), a state (lone, alone), or action (rising, arising). Relevant applications can be with nouns, verbs (particularly with present participles), adverbs or prepositions.

The “a” in its functioning can be applied in all three tenses; to revert to a time-warp and use the language of the Haight-Asbury sixties, there’s an inherent sense of “It’s what’s happening, baby!” In terms of the tenses, and starting with “a live tree” we can have “The tree was alive a year ago”, the tree is alive and flourishing”, and “The tree will stay alive if it’s taken care of”.

Here is a score of examples of how the humble “a” can transform both form and function:

It is interesting to note that the use of the prefix “a” can be found in dialectal speech in remote parts of the country such as the Ozarks or Appalachia. Here one can still hear speech that includes words such as abed, abide, a-weary, and expressions like gone a-huntin’, gone a-courtin’, his wife’s a-bornin’, etc. This archaic language is preserved in folksongs of yesteryear such as

Mr. Froggie went a-courtin’, and he did ride mm mm
Six dukes went a-fishing, down by the sea side
A-roving, a-roving, since roving’s been my ru-i-n, I’ll go no more a-roving with you, fair maid
