VOWEL SWAP TRANSPOSALS

TRAILS-TRIALS and MANTEL-MENTAL are examples of 6-letter vowel swap transposals (VSTs), the 2 vowels swapping places and the 4 consonants remaining in situ. Here, I search for 6-letter VSTs having 2, 3, 4, 5 and 6 vowels respectively, all the vowels changing places with other vowels. Previous items on letter swap transposals (WW91038, 91089, 91252) deal solely with swapping 2 letters according to their positions in a word: e.g 3-6 CANTOR-CARTON and 5-6 ALBION - ALBINO, irrespective of whether the 2 letters are consonants, vowels or one of each. They do not include any 6-letter/2-vowel VSTs. This is not surprising as VSTs involving familiar words are scarce. In most cases it is necessary to turn to more obscure words or to locational names (identified below by country). Pluralised locational names, where the name appears in more than one country, also prove valuable.
A few of the VSTs are synonyms and these are identified by an asterisk*.
In many cases, only a single example of a particular VST was found. All are solid words. The lists of words read across the page.
Some of the unreferenced words can be found in the Oxford English Dictionary, Second Edition; some were found via Google. Locational names are taken from The United States Board on Geographic Names. Sources for the referenced words are given at the end.

2 VOWELS + 4 CONSONANTS

Considering the 5 major vowels A, E, I, O and U, there are 10 combinations of 2 different vowels: ae, ai, ao, au, ei, eo, eu, io, iu, and ou. For each of these 10 combinations, there are 15 positions which 2 vowels can occupy in a 6-letter word: positions 1 and 2, 1-3, 1-4, 1-5, 1-6, 2-3, 2-4, 2-5, 2-6, 3-4, 3-5, 3-6, 4-5, 4-6, 5-6. This makes a total of 10 x 15 = 150 arrangements of 2 different vowels in 6-letter/2-vowel words. The 19 arrangements for which no VSTs were found are shown in brackets following the ‘positions’ headings.

3 VOWELS + 3 CONSONANTS

Progressing to 6-letter words with 3 vowels, it is possible to find VSTs in which all three vowels vacate their original positions, the consonants remaining in situ as before. The triple vowel swaps below illustrate the 10 combinations of 3 different vowels: aei, aeo, aeu, aio, aiu, aou, eio, eiu, eou, and iou respectively.

The 2 identical vowels swap places with the remaining 2 vowels. There are 30 combinations of 4 vowels in which one of the vowels is duplicated, starting with aaei:
