LONG WORD WEAVES

Word weaves were introduced by Steven Kahan in the Feb 2005 Word Ways. When the letters in the odd positions of a word appear alphabetized, we say that the word is odd-ascending and when these letters appear reverse alphabetized, we call the word odd-descending; even-ascending and even-descending are defined similarly. A word in which both the odd letters and the even letters are either ascendant or descendent is called a word weave. Here is a selection of such words of nine or more letters; all are to be found somewhere in the OED or Webster 2 except where noted.

Odd Ascending, Even Ascending
94 of length 9: acheilous, acheirous, bachelors, backdoors, back-entry, back-flips, bedfellow, bed-length, bickerful, echellons, Edgehills (New Zealand, linz.govt.nz), gallon-pot, half-minot, half-ports, hall-moots, heliports, lamentour, Mandrotsy (Madagascar)
