Selfish words (from 1,200 examples)
I have often been taught that I would be rude to readers if I continually used the pronoun I in sentences I wrote: I would be accused of solipsism as well as a publishing solecism. Indeed, people who are enthusiastic about political correctness might say, without even thinking (too difficult for them anyway), that one ought to avoid words with too many of the letter i. So here is a modern Index of prohibited words, mainly selected for concentration of the letter i (ie a high percentage of the letters), and with a bias against proper nouns. A few interesting exceptions are given.

5 x i  [the 6-letter iiiili and the 7-letter XIIIIIII are in the OED]. There are six place names like Aimiliiki (9, Palau, 7° 26', 134° 29', NIMA). Length 10 has numerous place names like Girigiriri (Nigeria, 11° 41', 12° 18', NIMA), but also inimicia (OED inimicitious, Latin), inimicitia (OED inimicitious, Latin). Length 11: [Anochetus] chirichinii [furvis] (ITIS animal), inimicitial (OED), and divisibilis (Chambers divisible, Latin), as well as divsuisibilis, incivilitie, incivilitie, indiuisibil, induisibilis, incomitiae, inimicitias, insipiditie, inviirilitie, invisibilitie, libidinizing, minimsfidian, minimsfidianism, nimini-piminyism.

6 x i  12 letters: indivisibili (OED graveller 1674q, Latin), nimini-pimini (OED), Hiwikirikiri (-41° 49', 175° 53', www.linz.govt.nz/databases/geographic), and Iriririmirim (Brazil, -20° 32', -40° 48', NIMA). 13 letters: divisibilitie (OED divisibility, French), indiuisibilis (OED undepartable, presumably Latin), invisibilitie (OED invisibility 1361q), and nimini-primini (OED nimini-pimini). Length 14 brings recognisable words: divisibilities, ignitibilities, indivisibility, divisibilities, ignitibilities, indivisibility, divisibilities, ignitibilities, indivisibility. Length 15 includes immiscibilities, ineligibilities, inimitabilities, invincibilities, minimsfidianism, nimini-piminyism.
