

# AMBIDEXTROUS AND ANTIDEXTROUS WORDS

REX GOOCH

Letchworth Garden City, Herts, England

rexgooch@ntlworld.com

In the November 2001 Kickshaws, an ambidextrous word is defined as one whose first half contains only letters from the first half of the alphabet, and whose second half contains letters from the second half of the alphabet. An antidextrous word is defined the other way round. In the following, words of even length only are considered, to avoid the problem of the central letter in words with an odd number of letters.

In the case of ambidextrous words, it is difficult to find anything better than AMBIDEXTROUS, except for phrases. For antidextrous words, PUZZLE-HEADED (which I could not find in dictionaries) is easily equaled and just surpassable.

Heterograms (all letters different) are marked with an asterisk. The source of all words is the Oxford English Dictionary, except when noted otherwise (Ch = Chambers; US and Canadian place names from Columbia Gazetteer of North America ).

## Ambidextrous length 12

\*AMBIDEXTROUS

BLACK BOURTON (Oxfordshire)

BLADDER-SNOUT

CALABAR POTTO (Calabar potto)

CHAMBER-STORY (chamber)

FIELD-HONOURS (field 1737q)
