

VOWEL-CONSONANT PATTERNS: 10-LETTER WORDS

SUSAN THORPE

Great Missenden, Buckinghamshire, England

thorped@hotmail.com

This is a sequel to *Vowel-Consonant Patterns* which covered V-C patterns in 7-, 8- and 9-letter words (Word Ways 2002249 and 2003038).

There are 1024 (2^{10}) different 10-letter V-C patterns, 512 beginning with a consonant and 512 beginning with a vowel. As previously, only solid words are accepted, and words with the letter Y are not admitted.

In the August 2000 issue of Word Ways (p236), Ross Eckler looked in Webster's Second Edition for words with V-C patterns having no more than 2Cs or 2Vs in a row. There are 178 such patterns and Ross found words for 175 of these.

My search is not confined to Webster's Second. In the lists which follow, a single example is given for each of the V-C patterns wherever possible. Ross's words are *italicised*. I have taken the liberty of replacing a few of his words (*) as follows: by a more common word; hyphenated words (e.g. OCEAN-GOING) by non-hyphenated words; and words with a Y with Y-less words. In a few cases, I have replaced a plural, although the use of some plurals is inevitable. I found words (**) to fill Ross's 3 gaps. Unsurprisingly, in an exercise which runs the gamut of the 1024 10-letter V-C patterns, many of the words are obscure and the lists contain a substantial number of variant forms and locations.

Some, or all, of the letters of a word may be underlined (or overlined), so identifying one (or two) special features. These may be palindromic, tautonymic, Miami or ladder sequences of letters; groups composed of 5 different vowels; AEIOU words; striking occurrences of one or more doubled letters; 5-letter bigrammatic groups; and 2 or more common letters at the beginning and end of a word. OKEECHOBEE (vCvvCCvCvv) exhibits horizontal symmetry.

Unreferenced, non-italicised words can be found in the Oxford English Dictionary, Second Edition. Other references are: **baes** = The Bulletin of the Amateur Entomologists' Society, 1978; **bt** = Bloomsbury Thesaurus, 1993; **bw** = The Illustrated Encyclopedia of the Butterfly World by Paul Smart, Salamander Books, 1975; **ch** = Chambers Dictionary; **db** = The Dictionary of the Biological Sciences by Peter Gray, 1967; **dfpf** = A Dictionary of the Flowering Plants and Ferns by J.C.
