

COMPOUND INTEREST

ARTHUR SCHULMAN
Charlottesville, Virginia

More than 90% of the elements of the periodic table consist of consonants which, rearranged with appropriate vowels, may produce new (and occasionally apposite) words. Here are some that I found. Those marked by an asterisk, and perhaps some of the others, can lead to alternative compounds, which readers are encouraged to find.

Every compound must contain only those consonants in the name of its element source, each consonant appearing as often in the compound as it does in its source. Thus ACTINIUM gives rise to ANATOMIC, but not to MONOTONIC. (ELEMENT itself gives rise to UNTIMELY, but not to MONUMENTAL, while COMPOUND gives rise to IMPUDENCE but not to COMPENDIUM). Y counts as a vowel, so that one can make UNLUCKY out of NICKEL.

ACTINIUM: anatomic*
ALUMINUM: minimal*
AMERICIUM: macrame*
ANTIMONY: animation*
ARGON: genera*
ARSENIC: scenery*
ASTATINE: tetanus*
BARIUM: embryo*
BERKELIUM: Kimberley*
BERYLLIUM: umbrella*
BISMUTH: thumbs*
BOHRIUM: mihrab*
BORON: auburn*
BROMINE: number*
CADMIUM: modicum*
CALCIUM: comical*
CALIFORNIUM: conformal*
CARBON: anaerobic*
CERIUM: America*
CESIUM: mosaic*
CHLORINE: Herculean*
CHROMIUM: chummier
COBALT: citable*
COPPER: prepuce*
CURIUM: (see CERIUM)
DARMSTADTIUM: ?
DUBNIUM: bemoaned*
DYSPROSIUM: impressed*
EINSTEINIUM: moonstone*
ERBIUM: (see BARIUM)

EUROPIUM: empire*
FERMIUM: Fromm
FLUORINE: funeral*
FRANCIUM: conform*
GADOLINIUM: molding*
GALLIUM: glumly*
GERMANIUM: Grumman*
GOLD: deluge*
HAFNIUM: ?
HASSIUM: messiah*
HELIUM: homily*
HYDROGEN: hoarding*
INDIUM: domino*
IODINE: Aeneid*
IRIDIUM: redeem*
IRON: Urania*
KRYPTON: partaken*
LANTHANUM: Hamiltonian
LAWRENCIUM: ?
LEAD: daily*
LITHIUM: Hamlet*
LUTETIUM: motility*
MAGNESIUM: summing
MANGANESE: ignominious*
MEITNERIUM: momentary*
MENDELEVIUM: ?
MERCURY: creamery*
MOLYBDENUM: undimmable
NEODYMIUM: madman*
NEON: anyone*
NEPTUNIUM: pentomino
NICKEL: unlucky*
NIOBIUM: Bimini*
NITROGEN: generation*
NOBELIUM: amenable*
OSMIUM: miasma*
OXYGEN: exogeny (below the line in NI2)
PALLADIUM: millipede*
PHOSPHORUS: ?
PLATINUM: PLUTONIUM*
POLONIUM: lampoon*
POTASSIUM: stamps*
PRASEODYNIUM: ampersand*
PROMETHIUM: morphotomy (below the line in NI2)
PROTACTINIUM: compartition*
RADIUM: see IRIDIUM

RADON: indoor*
RHENIUM: hormone*
RHODIUM: headroom*
RUBIDIUM: bromide*
RUTHENIUM: marathon*
RUTHERFORDIUM: ?
SAMARIUM: memoirs*
SCANDIUM: consumed*
SEABORGIUM: umbrageous*
SELENIUM: luminous*
SILICON: nucleus*
SILVER: valorous*
SODIUM: medusa*
STRONTIUM: terminates*
SULFUR: fire sale*
TANTALUM: emollient*
TECHNETIUM: Mattachine
TELLURIUM: mortally*
TERBIUM: timbre*
THALLIUM: ?
THORIUM: theorem*
THULIUM: see LITHIUM
TIN: Aetna*
TITANIUM: mutation*
TUNGSTEN: stagnation*
URANIUM: manure*
VANADIUM: unmoved
XENON: Nixon*
YTTERBIUM: embitter*
YTTRIUM: matter*
ZINC: Anzac*
ZIRCONIUM: Americanize
