In my *Designer Isomorphs* (WW May 2001), the various different Isomorph genres included a few Isomorph pairings. Here are more. Below, each example consists of 2 words which, together, make sense eg. NERVIER ENTRANT (represented by - 12 - - 12) and WILLIAM KENNEDY (rep. by - 1221 - -). Each word has 2 different repeated letters in corresponding places in the 2 words. All the different possible arrangements of 1212 and 1221 are given for words with 4, 5, 6 and 7 letters.
