

CROSSWORDS FOR EACH CHAPTER IN ANNOTATED ALICE

Ashley Post (student)
Lewis Center Ohio

Final Project Write-up

For my final project, I completed a crossword activity book. There are crosswords for each one of the chapters in the Annotated Alice book. This include the Adventures in Wonderland and Through the Looking Glass. For each crossword I picked eleven words that related or were found in each chapter. Most of the words were themes or characters found in that chapter. To make the activity book seem a little more whimsical, I decided to make the crossword so that the words would have to be written backwards and the clues that were given for the words were the letters found in the words but jumbled up. Originally, I had plans to also create a riddle that would tie into the crosswords but due to complications with the crossword puzzle and the inability to edit the crossword, I was unable to do so.

This project was considered to be creative because I went through each of the chapters and found the words that were used in the chapters. Next, I found a website that would allow me to generate a crossword by typing in the words I wanted to use. I had to convert the words to backwards formation and then use a random letter scrambler to create my clues. The website I used for the crossword puzzle was <https://worksheets.theteacherscorner.net/make-your-own/crossword/#>. The website I used to scramble the letters was <https://randomize.com/word-scrambler/>. This project was also of personal interest to me because I love doing crossword puzzles. I have never had a chance to make one of my own, so I thought it was really interesting to get the opportunity to do this. It was a challenge to figure out how to make the crossword puzzles, but I feel that they turned out good.

This project relates to Lewis Carroll because I used each one of his chapters to pick out words that are used in the crossword puzzles. Also, by making the words be backwards it is similar to the nonsense that he has created in Wonderland.

For the Honors program goals I feel that I have successfully implemented those into my work. First, anyone has the capability of printing the project off and completing the crosswords on their own time. If they get stuck on words, I have provided a list that has each of the words that are used for each chapter. This will allow people to try and complete the crossword puzzle on their own. I also had to research different words to use in the text and I had to learn how to create a crossword puzzle. Also, no one has created a crossword puzzle book that has the words backwards, so it adds to the creativity and individuality of the project. By doing this, I have satisfied the research and creativity section. Creating a crossword puzzle was new territory for me and allowed me to learn more about creating different types of puzzles. Finally, this is considered to be an innovative method of learning because it allows people to learn general themes and characters of each chapter through the completion of a puzzle.
