WEBSTERIAN HIGH-SCORING SCRABBLE

KYLE CORBIN
Raleigh, North Carolina

The article "High-Scoring Scrabble Revisited" in the May 1981 Word Ways presented a set of rules for determining in a SCRABBLE Brand Crossword Game (hereafter referred to simply as Scrabble) what words are to be allowed. Applying these rules, a single Scrabble move of 1757 points was devised, based on words in Webster's New International Dictionary, Second Edition. The article further stated that it would be an excellent idea to find the highest scores for the entire range of Merriam-Webster dictionaries to show their variation with dictionary size. This has now been done for three Websterian dictionaries: 1762 points using Webster's New International Dictionary, Second Edition (1958); 1665 points using Webster's New Collegiate Dictionary (1980); 1510 points using the Merriam-Webster (Pocket) Dictionary (1974).
