FECUND PHONETICS

SUSAN THORPE  
Great Missenden, Buckinghamshire, England  thorpeds@hotmail.com

The same letter, or group of letters, can have different pronunciations and hence be represented by different phonetic symbols. This is demonstrated in Unusual Words (2008145) and Arbitrary Words. Conversely, the same phonetic symbol can represent different letters or group of letters. For example, both the E and I in PHONETIST are pronounced as is the I in PIT. A phonetist is a person versed in phonetics. Each of the words below has more than one identical phonetic symbol represented by a different letter or group of letters. The phonetic symbol is given first, together with the different letters/letter groups it represents in the words listed. The phonetic symbols are those used in the phonetics list of the Oxford English Dictionary, Second Ed.

TWO IDENTICAL PHONETIC SYMBOLS

**LONG VOWELS**

i: (as in bean) e ee ie ea æ y i eo ei ey ui œ  
defreeze piecemeal fæces completness Timorese repeople  
preconceive Ceylonese Guianese synækte (an insect that lives harmlessly with ants or other social insects)  
ɑ: (as in barn) ar a ah aa  
armada Bar- Mitzvah aardvark  
ɔ: (as in born) aw or au ar o  
hawthorn augmentor Warsaw Porlock (a town in Somerset, U.K.)  
u: (as in boon) oo oe u  
hoopoe (a bird) schussboomer (a fast downhill skier)  
ɔ: (as in burn) ir or er ur ear  
birthwort (a shrub genus) perturbation earthworm  
e: (as in schnee - German) ee e  
beereauslese (a sweet white wine)  
a: (as in tag - German) a ah  
schlagsahne (whipped cream)  
Ø: (as in Goethe – German) eō ö  
Fötvös (a Hungarian physicist)

The combination of the phonetic symbols j (sometimes regarded as a semi-vowel) and u: (ju:) is pronounced as the letter U in the alphabet, and also as the whole words you and view:

ju: eu u  
euthutropic (describes certain earthquake shocks)
**SHORT VOWELS**

I (as in pit) e i y a u ie ee æ ey œ
bewitch fifty arbitrage busy busied breeches phonæsthetic

voorloper (a boy who walks with a team of oxen) kokerboom (a large Aloe plant)
ɵ (as in boar) or ou o
fore-court fourscore
**TRIPHTHONGS**

ai (as in fire) ye io i iro  

syenodiorite (a type of rock) tiring-irons

**TWO ADJACENT IDENTICAL PHONETIC SYMBOLS**

These words each have a doubled phonetic symbol.

**LONG VOWELS**

i: (as in began) e ae œ  

zoe ae (a larval crustacean) pale ae (Botany: inner bracts) pre-OEdipal (a term in psychoanalysis)

**SHORT VOWELS**

i (as in pit) y i e a ey  

copy ing thirty ish fifti eth foli age line age Wesley ism fide ism

**DIPHTHONGS**

ai (as in bite) ie i ay eye  

die idism (the condition of having 2 different forms at different stages of life)  
mackay ite (a green hydrated tellurate of ferric iron) pie-eyed (drunk)

**CONSONANTS**

ʃ (as in shoe) s c  

cres cendo

**THREE IDENTICAL PHONETIC SYMBOLS**

**LONG VOWELS**

i: (as in began) œ e ie  

cœnospecies

**SHORT VOWELS**

i (as in pit) y e i  

synthesis femality phenyllic (of, or derived from, phenic) fidgety

ə (as in another) a e ou  

aphanipterus (pertaining to the Order Aphaniptera, insects in which the wings are rudimentary scales)

The two words felicity and phillygenin (C$_2$H$_2$O$_6$) each have four identical phonetic symbols (i). However, 2 of these represent the same letter (i) in each case.
