A LOGO-TRIVIA QUIZ

DMITRI A. BORGMAANN
Dayton, Washington

It had to happen. The recent trivia craze sweeping the nation has finally invaded the sacred precincts of logology. Here, then, is the first full-fledged logological trivial quiz. It happens to be one placing the beginner on a par with the expert: so far as I know, none of the items included has previously appeared in Word Ways, my books, or anywhere else. Have fun!

1. The Greek letter upsilon is sometimes called the ________ letter or the ________ letter, though it could also be called the ________ letter.

2. All three editions of Webster's Unabridged have used the word floccose-woolly in defining the term ________ ________, even though floccose-woolly is internally redundant (floccose means woolly) and is not included as an entry in any known English dictionary.

3. When he died in 1977, singer Elvis Presley fulfilled the anagrammatic prediction that he would pass into a state of eternal ________.

4. The ________ chicken is actually a Nova Scotian herring.

5. How inauspicious it is that Sunday, Monday, Tuesday, Wednesday, Thursday, Friday and Saturday numerologically exemplify the ________ ________ ________!

6. The difference between ________ and ________, two homonyms, is that the first is flat whereas the second is round.

7. The technical term for the pleasurable excitation enjoyed by men watching girls in miniskirts is ________ ________ ________.

8. The palindromic, tauntonymic, and univocalic Hawaiian village name Eleele appears in boldface type on the numerologically remarkable Page ________ of Webster's Third Edition. As what?

9. An indispensable English word designating certain real-world entities, one of Anglo-Saxon or Old English origin, ends with two consecutive, different plural suffixes. That word is ________. What are the two suffixes?

10. The longest known English designation for one of the chemical elements is ________ ________; it is an exact synonym for ________.

11. In rhetoric, replacing one pronunciation of a word with another pronunciation, for the sake of rhyme or euphony, is known as ________.

12. The ----UMNE-, the ----UMNE, and the ----UMNE are three of the mighty rivers coursing through central ________.
13. ------ _______‘--- well-known crossword dictionary cites the 21-letter term honnisotquimalypense as the longest English word "in the dictionary." How should the term be spelled? What is it? What does it mean?

14. Someone experiencing a _______ _______ is choking on food. The victim uses _______ _______ to signal his condition to those around him, and the rescuer executes the _______ _______ in an attempt to dislodge the food from the victim’s windpipe. (Note: the final term called for is not "luckless sufferer"!)

15. That language which includes both the alphabetically first and the alphabetically last uncompounded, one-word number names is _______. The number names are _______ and _______.

16. In the comparatively recent Pinyin system of orthography, the name of Shanghai is spelled _______.

17. A commonly-purchased over-the-counter drug that could easily be touted as a remedy for companionlessness uses the trademark name _______. What logological advertising slogan would you recommend for this product?

18. The _______INdIAN was a fictional product of 19th-century England.

19. The _______ suit and the _______ suit are at once exactly the same and exact opposites.

20. An area frequently referred to as the _______ _______ _______, smaller in size than is the Philippine island of Luzon, includes both Levant and Orient within its borders, in addition to China, Denmark, Egypt, Lebanon, Mexico, Norway, Peru, Poland, and Sweden. What are some of the other names for the same area?

21. The game of trictrac or tables reminds us of the Garden of Eden because each player _______ _______ _______.

22. Within the text of the definition of _______. intermediate-size dictionaries variously describe a certain location, one which has acquired particular significance in recent decades, as an area, cleft, depression, hollow, separation, or space.

23. On the _______ scale, water boils at a temperature of 270.27 degrees.

24. What staid British reference work lists Belmont as one of the states of the United States? (The name is not a misprint for Vermont, since the work in question also includes that name.)

25. In terms of its absolute (signless) value, the smallest real number identifiable by means of a concise verbal designation or description using all four of the rare alphabetic letters J, Q, X, and Z is the number _______. How?

Answers can be found in Answers and Solutions at the end of this issue.
