ON THE TABLE

HENRI PICCIOTTO
Berkeley, California

Although I hope it is not too easy, this cryptic crossword is elementary. Clue answers are always longer than would appear from a count of the corresponding boxes. Periodic consultation of a certain reference may be helpful in squashing them into the diagram. Answers include four proper nouns. 8, 9, 21, and 27 are relatively uncommon words. Unclued are an abbreviation, a conjunction, a noun, a preposition, two pronouns, and a verb.
