SINGULAR CONSONANT TRIOS – 1

STEVE KAHAN
Hollis Hills, New York

Targeted here are a dozen eight-letter words that essentially have been “disemvoweled” by removing any and all occurrences of the five vowels A, E, I, O, and U from them. The remaining trios of consonants appear in the words in the order of their presentation. For instance, given the trio P L G, there are at least two acceptable words which meet the criteria – APOLOGIA and EPILOGUE. How many of the twelve can you recognize?

1. B T S
2. C D M
3. G M N
4. L N T
5. M N T
6. N L G
7. P R N
8. Q R M
9. R T N
10. S Q G
11. T H S
12. V C S
