NOAH'S VOWELS

This is a belated sequel to Noah's Consonants (WW2002119) in which single words with just 2 of each of their different consonants were allowed entry into Noah's Ark.

Currently, it is single words with just 2 of each of their different vowels which are allowed entry to the Ark. Only words with three or more pairs of vowels are considered. As before, Noah turns away hyphenated words, coinages, palindromes, tautonyms and pair isograms.

The vowels may be arranged in 2 main ways in the word:
A. at random
B. according to some pattern
   (a) in like pair order as in REPEATABILITY
   (b) all vowels as doubled letters as in CEELCAANOOD (Somalia)
